

Experiment 4

Create a web application which should implement onload(session has to get created), HTMLTableElement(must be able to create a new row in the table dynamically).

Install easyPHP in your laptops. <http://www.easyphp.org> (webserver on the localhost)

In Hosting, PHP will be there by default.

Application Clearly.

Create a website which is responsive and the visual framework which you are being instructed to do in the previous experiments and get the details from the user to build Resume`

Step 1:

Get the following details from the User

1. Name(validation, no numbers must be entered)
2. DOB(DDMMYYYY)
3. Father's Name
4. Mother's Name
5. City
6. Mobile number(validation)
7. Educational Qualification Details.

Ex:

| S. No | Qualification | Credentials | Institution |
|-------|---------------|-------------|-------------|
| 1 | | | |
| 2 | | | |
| 3 | | | |

If the user wants to add another qualification the table, you must provide an option for him to add an additional qualification to the table. This has to dynamic to the user needs.

(https://www.w3schools.com/jsref/met_table_insertrow.asp) follow the link to add the rows dynamically using javascript. Not Just adding a row to the table, you have to take values from the user (<http://talkerscode.com/webtricks/add-edit-and-delete-rows-from-table-dynamically-using-javascript.php>). Follow the link just as an example. Save all the information given the user to a session. (this can be done only using PHP).

(https://www.w3schools.com/php/php_sessions.asp) which is very simple. You can do this by saving your file with .php extension.

(<https://www.youtube.com/watch?v=WuZBQ706thI>).

Step 2: Now you have to add all the elements to the session variable using PHP start_session(), Loops(javascript)

Step 3: After pushing the submit button, the form has to redirect to a new page, where it should display the values that are entered by the user in the previous page and stored in the session variable. After displaying the details in the session, close the session.
