

Step-1

Create a registration Page, as created in Challenging Task-2 and insert the user given values to the data base using JDBC connectivity. (servlets/JSP)

Step-2

Create a webpage which accepts the registration number from the user, retrieves the data present in the database and allow the user to edit/update the values.

Challenging Task – III

Create a webpage, which should have two buttons,

- Registration (step-1)
- Update (step-2)
